Even the war, with all the critical problems it created for the entire furniture industry, could not alter that policy. Faced with the question of increasing production at the expense of quality . . . or limiting production to the level necessary to maintain their standard . . . Kroehler had only one answer. Kroehler never has and never will compromise quality. Not for convenience or temporary profit would we allow slipshod methods, inferior materials or workmanship bear the trusted Millenson label anymore than would Kroehler.

These labels—for what they stand—are a trust fund, for you and for us. The fact that their value has been enhanced throughout the war years, strengthens the position and reputation they enjoy throughout the entire Tri-State area.
